Chapter Campout 2012:

Planning Meeting:

Still in the works.

For Sale: FREE I have a Tulsa Tall Tinted windshield (non vented) for a GL1800 that I was not pleased with. It has a light fog appearance to it when viewed in some situations/light conditions.

I had it installed on my GL1800 for a week or two and just did not like how it looked. Visibility was not impaired in any way but it just was not right compared to the Tulsa Tall Tinted windshield on my GL1500.

After receiving one replacement from Tulsa, I had them replace it again with a clear one. They did not want the old shield returned. They found that all the tinted shields they had in stock had the same problem and it had not been detected previously. They said that they scrapped all that they had that were tinted. The clear shields were not affected. I am happy with the clear shield on my GL1800 now.

If you know anyone who wants it, send me an email and then arrange to come and get it.

If you would like to have this windshield, let me know because it will be in the trash by Saturday the 21st of January.
